

IT Staff Augmentation Services

Knowledge Base (K-Base) can assist your organization by augmenting your IT department by providing IT staff whether development or IT operational support. With Knowledge Base development centers in Malaysia (HQ) and India offices and vast access to resources, we can provide various quality resources to fulfill your application development needs. We can provide quality resources whether short or long term duration. Our Staff IT augmentation will provide cost saving benefit, this is because our staffs overheads are much cheaper compared e.g. MNC standards. Our rates are competitive as we prefer to work long term with small margins.

We are dedicated to providing our customers the right resources when they're needed at competitive rates based on monthly rates:

The following resources can be provided:

- ❖ Project Managers
- ❖ Architects/Designers
- ❖ Software Development Engineers – ORACLE, ASP.NET, J2EE and C+
- ❖ Business Intelligence and Data Warehouse developers
- ❖ Application Software Testers
- ❖ Quality Assurance Consultants

'Right To Hire' Program

Knowledge Base often provides consultants on a right-to-hire basis. Companies make a considerable investment when utilizing consultants and many feel that it is advantageous to hire the individual at the end of the contract. We provide our clients and consultants an opportunity to determine their compatibility. If the company wishes to hire a Knowledge Base staff member prior to the end of the contract, Knowledge Base's 'Right To Hire' Program provides the company that option on conversion fee.

Knowledge Base Guarantee

Our peace of mind plan provides you the assurance that we will replace the consultant should they not meet your expectations or other reasons at no cost. That's the Knowledge Base quality and business policy - to ensure that our customers are serviced professionally.
